

Manasa Bhimisetty

PROFESSIONAL SUMMARY

Enthusiastic Full Stack Developer with hands-on experience in developing web applications using HTML, CSS, JavaScript, and frameworks like React and Node.js. Strong understanding of front-end and back-end development, database management, and REST APIs. Passionate about writing clean code and improving user experience. Looking for an entry-level role to kickstart my career in web development.

TECHNICAL SKILLS

Programming: Python, JavaScript (ES6+)

Databases: MySQL, MongoDB

Front-end Technologies: HTML, CSS3, React.js(Basics / Hooks)

Tools & Technologies: Git & GitHub, VS Code

Web Concepts: REST API's, DOM Manipulation, Event Handling

Soft Skills: Problem-solving, Leadership, Adaptability, Time management

INTERNSHIP

Full Stack Python Trainee

Social Prachar

Nov 2025 – Present

- Currently pursuing Full Stack Python development training at a professional institute, gaining hands-on experience in both front-end and back-end technologies.
- Learning to design and develop responsive web applications using HTML, CSS, JavaScript, along with Python frameworks for server-side development.
- Acquiring practical knowledge in database management, application logic, and integration, while working on guided projects and real-time use cases.

Web developer intern

LetsGrowMore

Sep 2023 - Oct 2023

- Created visually captivating and engaging user interfaces by utilizing HTML, CSS, and JavaScript to design and develop web pages.
 - Accomplished notable projects including a to-do list, application showcasing, as well as efficient task management and functionality.
-

EDUCATION

Sri Indu College Of Engineering and Technology – Hyderabad, Telangana

Dec 2020 – July 2024

Bachelor of Technology in Computer Science and Engineering

CGPA – 8.38

Sri Chaitanya Junior College – Hyderabad, Telangana

Jun 2018 – Apr 2020

Intermediate (MPC)

CGPA – 9.2

Saint Paul's High School– Hyderabad, Telangana

Jun 2017 – Mar 2018

SSC

CGPA – 9.0

PROJECTS

Information Crunching and Storage Enhancement Approach

Sep 2023 - Dec 2023

Sri Indu college of engineering and technology

- Developed a multilayered data compression framework to reduce data size before storing in the cloud.
- We utilize data compression techniques to minimize data size for storage.

- Applied HTML, CSS, JavaScript, and Java to build the software application. - Addressed the challenge of managing and storing large volumes of data generated by increasing number of connected devices and sensors.

CERTIFICATIONS

- Python 101 for Data Science by IBM (Cognitive class)
- Database Management System by Great Learning.
- Certificate Of Participation in Workshop of AI & ML with Techgyan
